EUROVAC I – INDUSTRIAL PORTABLE

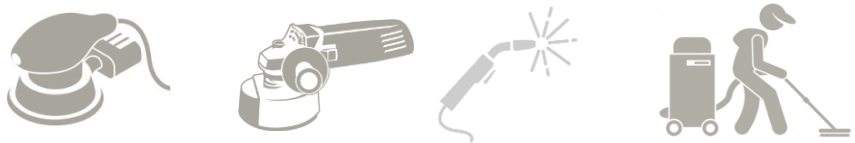
Powerful Regenerative Blower
Ideal for orbital sanding, grinding, welding or housekeeping applications.

Long lasting - Low Maintenance
The regenerative blower has a T.E.F.C. Induction motor rated for 20,000 hours, which outlasts brush motors found in most portables. Regenerative motors require little or no maintenance.

Superior Filtration
Cyclonic filtration removes 99% of dust before the secondary filter. This results in the unit operating much more efficiently than units which do not have cyclonic filtration. The remaining 1% of dust is removed by a secondary cartridge filter which cleaned by compressed air pulse jet cleaning action.

HEPA Filtration
HEPA filtration is available by adding a filter between the pump and the cartridge filters. HEPA filters remove any remaining particles to 99.97% at .3 microns or larger.

Applications:



Sanding | Grinding | Welding | Housekeeping
