EUROVAC

MODULAR CENTRAL DUST COLLECTOR

Eliminate dust & fumes at the source with a modular dust collector

PRODUCT DESCRIPTION

Eurovac's Modular Collector is designed to filtrate air from dry applications. Applications such as welding smoke, metal dusts, some pharmaceutical dusts, and most non-explosive dry dust's can be handled by Eurovac's Modular Filter. The units are modular in construction and can be ordered in 1,2,3 or even more modules. The modules can also be refitted in the field by removing panels and bolting additional units together. Thus making it ideal for growing companies. The Modular Collector Filter is not designed for excess temperatures, explosive contaminants or flammable gases. Thanks to the Modular Collector's high filtration efficiency, filtered air can be returned to the working area.

The Eurovac's Modular Collector's control panel comes as standard with:

- thermal overload protection for fan motor.
- automatic timed cleaning with offline pulsing after shut-down.

With a Eurovac Modular Collector you will recieve:

- Superior products designed to withstand even the most rigorous industrial facilities.
- Superior filtration - Initial cartridge filtration plus secondary compressed air reverse pulse jet cleaning system
- Properly engineered layouts

Typical applications include welding fumes and stationary equipment
